

Power Supply Closed System Cooling Tower Low Maintenance

Basic Information

- Place of Origin:
- Brand Name: Huarui
 Certification: patent; national testing report; quality management system

China

1 set

to be customized

- Model Number:
- Minimum Order Quantity:
- Price: to be negotiated
 Packaging Details: waterproof
 Delivery Time: 30~45 days
- Payment Terms: T/T; L/C
- Supply Ability: 1000000 sets/ year

Product Specification

Highlight:	Power Supply Closed System Cooling Tower, Closed System Cooling Tower Low
• Efficiency:	High
Advantage:	High Power Saving
Maintenance:	Low
Water Consumption:	Low
Noise Level:	Low
Durability:	High
• Warranty:	12 Months

Maintenance

Product Description:

In a closed-loop cooling tower, water circulates in the coils and gives off heat after coming into contact with the wall of the coil. This is then exhausted outside by the fan located at the top of the tower. When the temperature of the water inside the coils gets too high (above the set temperature), the spray system kicks in automatically and sprays water onto the hot and damp coil walls to form a water film. Heat from the coils is then absorbed by the water film and turns into vapor, which is carried away by the flowing air. The water droplets that didn't evaporate falls into the collection tank for recycling.

Such cooling towers have minimal water consumption, as the water in the coils circulates in a closed loop and the amount of spray water used is also very small. This results in an overall low water consumption.

Features:

This product has many advantages, including *low water consumption, high cooling efficiency, small covering area, compact structure, no scale deposit inside the cooling system, and no environmental contamination.*

In terms of water consumption, this product can be used for a longer time with a relatively smaller amount of water replenished.

The cooling efficiency of this product is better than most typical products, which can satisfy different requirements. Covering area is relatively small, saving users much space.

Compact structure makes the product light and convenient for users to move.

As to the scale deposit, it does not contain any inside the cooling system, avoiding secondary pollution.

Finally, this product has no environmental contamination, which ensures the environment clean and tidy.

Parameter	Value
Maintenance	Low
Warranty	12 Months
Efficiency	High
Noise Level	Low
Water Consumption	Low
Durability	High
Advantage	High Power Saving

Applications:

Huarui's closed cooling tower is the ideal solution for power supply cabinets and induction furnaces. It is equipped with a patent, national testing report, and a quality management system, ensuring high power saving and durability. It also features a low noise level and low maintenance. It is available for purchase in a minimum order quantity of one set, and the price is negotiable. The delivery time is 30 to 45 days, and payment terms are T/T or L/C. Huarui's closed cooling tower has a yearly supply capacity of 1,000,000 sets, and is waterproof packaged. In addition, customers are offered a 12-month warranty.

The closed cooling tower is perfect for applications in power supply cabinets and induction furnaces. It is reliable, powerful, and energy efficient. It is the perfect choice for those who require a low noise level and low maintenance.

Huarui's closed cooling tower is the perfect product for those who require a reliable and powerful cooling system. It comes with a patent, national testing report, and quality management system, and is available in a minimum order quantity of one set. It is waterproof packaged and has a yearly supply capacity of 1,000,000 sets. Its low noise level and low maintenance make it the perfect choice for power supply cabinets and induction furnaces.

Customization:

Closed Cooling Tower

Brand Name: Huarui Model Number: to be customized Place of Origin: China Certification: patent; national testing report; quality management system Minimum Order Quantity: 1 set Price: to be negotiated Packaging Details: waterproof Delivery Time: 30~45 days Payment Terms: T/T; L/C Supply Ability: 1000000 sets/ year Advantages:

High Power Saving

Low Noise Level High Durability

Low Maintenance

Closed Cooling Tower can be used in power supply cabinet to cool chiller and other power equipments, and it is also suitable for many other applications. With its high power saving, low noise level, high durability and low maintenance, Huarui Closed Cooling Tower is your ideal choice.

We provide 12 Months Warranty for all our Closed Cooling Tower, and we are also capable of customizing your order based on your requirements.

Support and Services:

We provide technical support and services for our Closed Cooling Tower products. Our dedicated team of professionals is available to _____ assist you with any technical questions you may have, as well as to provide guidance and advice on installation, maintenance, and troubleshooting.

We offer a variety of services including on-site inspections, parts replacement, and repair. We also provide remote support and telephone assistance to help you quickly and accurately diagnose and resolve any issues you may have. Our team is available 24/7 to ensure you receive the best service possible.

If you need additional help beyond our technical support team, we offer a range of consulting services. Our consultants are experienced in all aspects of Closed Cooling Tower technology, and they can provide strategic advice to ensure the best possible performance of your system.
